

VIKING ARM

VIKING ARM®
“BASE PAD”

GTIN 7 090050560114

Product Information

The gripping foundation to our Viking Arm® Tool arsenal has been designed and fashioned via requests and suggestions from our innovative customers.

The Base Pad can be fitted in a matter of seconds. Designed to protect surfaces from scuffs, scratches and abrasions with its non-slip, non-abrasive and soft-to-touch lifting surface. The Base Pad securely 'slide snaps' onto the heavy-duty carbon steel Viking Arm® base plate, to provide greater gripping technology and a softer interface. The Base Pad ensures the Viking Arm® Tool is secured to the surface while providing maximum protection. Effectively protecting delicate surfaces such as glass, finished timber, floors, ceramics, tiles, doors, windows, countertops, tables, enamels, and more from damage when lifting.

The pad works perfectly when coupled with either Viking Arm® Extender or Viking Arm® Lifting Pad.

Sold separately or as an integral part of the Viking Arm® Cabinet Installation Kit.

VIKING ARM
