Råd og tips!

- Lister bør ligge inne i min. 2-3 dager for akklimatisering, før de monteres. (Lister som leveres innpakket bør ligge i sin forpakning i 2-3 dager)
- Maling av ubehandlede lister bør skje tidligst 1 uke etter akklimatisering.
- Ved overmaling av ferdig malte lister bør disse først pusses med 120-papir.
- Ved montering av hardtrelister bør det forborres før spikring om du ikke benytter spikerpistol.
- Alle gjerdinger bør limes.
- Til sparkling av spikerhull benyttes gjerne akrylmasse.
