PRAKTISK INFO

I ekte tre er det naturlig med variasjon i farge og struktur. Dette er basert på vekstforhold og bearbeidelse og er det som gjør tre unikt og vakkert.

Utvalget i denne katalogen leveres i furu og eik av beste kvalitet. Sortimentet av hvitmalte lister er utført i standard farge: NCS S 0502-Y glans 30 (Bomull). Disse er merket "Malt". Hardved-lister (eik) leveres lakkert 1 strøk beckers acroma uv lakk glans 30.

Vi lagerfører også noen typer av gerikter og fotlister i klassisk hvit, NCS S 0500-N.

I klassisk hvit kan vi også skaffe alle lister og foringer.

RÅD OG TIPS!

- Lister bør ligge inne i min. 2-3 dager for akklimatisering, før de monteres. (Lister som leveres innpakket bør ligge i sin forpakning i 2-3 dager)
- Maling av ubehandlede lister bør skje tidligst 1 uke etter akklimatisering.
- Ved overmaling av ferdig malte lister bør disse først pusses med 120-papir.
- Ved montering av hardtrelister bør det forborres før spikring om du ikke benytter spikerpistol.
- Alle gjerdinger bør limes.
- Til sparkling av spikerhull benyttes gjerne akrylmasse.
